Alumni Engagement Opportunity

Needs Assessment

Project Title

Husky United: Alumni-Student Engagement Website

- Through the collaboration of Northeastern University Alumni Student Relations and the College of Professional Studies, we plan to work on developing a better and improvised resource for engagement of students and alumni, using different kinds of resources and platforms. The goal of the project is to improvise or provide a direct link between students and alumni. which would help with job placements.
- The project is divided into five phases with a deliverable and timeline that is according to the task's allocation. The 5 phases are: Project Initiation, Project Planning, Project Execution, Project Monitoring & Control, and Project Closure. We have divided the project into 5 phases to maintain the project timeline and improve the process improvements in the tasks.
- We are currently working on phase-based deliverables and scheduling projects, so we will adapt the Agile approach throughout the project lifecycle and working in sprints will benefit us to achieve weekly, monthly, quarterly, and task-based milestones as per the project strategy designed by the Alumni-Student Relations and the College of Professional Studies and the university's committee.

The core reason for adapting the Agile approach is the nature of the project being dynamic, which can lead to changing the deliverables numerous times in the timeline during the project tenure.

Project Goals

Our primary goal is to design a website portal for improving communication and engagement between current Northeastern University's College of Professional Studies students and alumni. To achieve the objectives of this business initiative, we developed a breakdown structure and added milestones in specific phases and time frames. To achieve our realistic goals as per our WBS timeline, the procedure comprises of,

- Creating a time-lined project charter with phase-wise deliverables, scheduled timelines and tasks based on the requirements needs in the business case, followed by final approval of the charter following the development of the business case in the Project Initiation phase.
- The goal is to analyze the current tools in use and work on the needs of students and alumni to increase their reach by 20% during the initiation period and then increase it on a phase-by-phase basis as needs change.
- The core support in any project is the finance section, and through the development of the website portal, students and alumni will be able to utilize the university's own resources, tools, and materials, which will benefit students by reducing their exterior costs by 15%.

Maximizing Reachability: The goal is to achieve maximum reachability by 30% in student-alumni engagement for communication, networking, job referral, course guidance, and future opportunities by providing them with their desired needs of tools and resources on the website.

Alumni Engagement Opportunity Needs Assessment

Business Requirements

Cultivating an active alumni network can be difficult, but with the help of “Huskey United” portal, we’re determined to build a strong student-institution relationship that spans the student lifecycle and extends after graduation. The goal of the project is to improvise or provide a direct link between students and alumni after graduation. An additional source “Husky United” portal would be created, including multiple resources such as one of the main features, Student-Alumni Relations would be introduced. Direct communication via the portal, which has updated features that allow students to prioritize sectors and contact alumni for personal interviews to learn about the talents and eligibilities for the essential interested industries.

Problems & Opportunities - Background

Building meaningful connections with students and alumni is critical for higher education programs' strategic growth and advancement. Alumni can keep in touch and create a global professional network even if they move away from university to seek a career. Engaged alumni provide mentorship opportunities and enhance job placement rates for current students at schools. In addition, colleges can work with alumni to achieve financial goals for scholarships and other campus improvements. Opportunities would be created as leaders have a chance to leverage technology to create engaging experiences and maintain a student-institution relationship across the student lifecycle and beyond graduation as institutions continue to explore new digital solutions to better support students who are learning remotely. This implies that institutions have the ideal foundation in place to create a unified and engaging experience for students from the beginning of recruitment to the end of their time as alumni.

Problem Definition Statement

A problem definition statement is a succinct summary of the issue or difficulties that a project is attempting to solve. The current state, the anticipated future state, and any voids between the two are all identified in the issue statement. A problem statement is a useful engagement tool that ensures that everyone involved in a project understands the problem they must solve and why the project is essential. It is crucial in a process improvement project since it helps define the project's goals and scope. It also aids in the direction of project participants' actions and decisions.

We have identified some of the problems/affects/impacts of the project and provided the necessary solutions to it, they are as follows:

Problem	Affects	Impacts	Solution
Lack of commitment from the alumni	Less Participation from the students	Losing interest in the portal	For commitment from the alumni, we will give additive benefits on our portal. Like, continued use of school resources, giving appreciation on the School’s official webpage which would increase the alumni’s social profile.

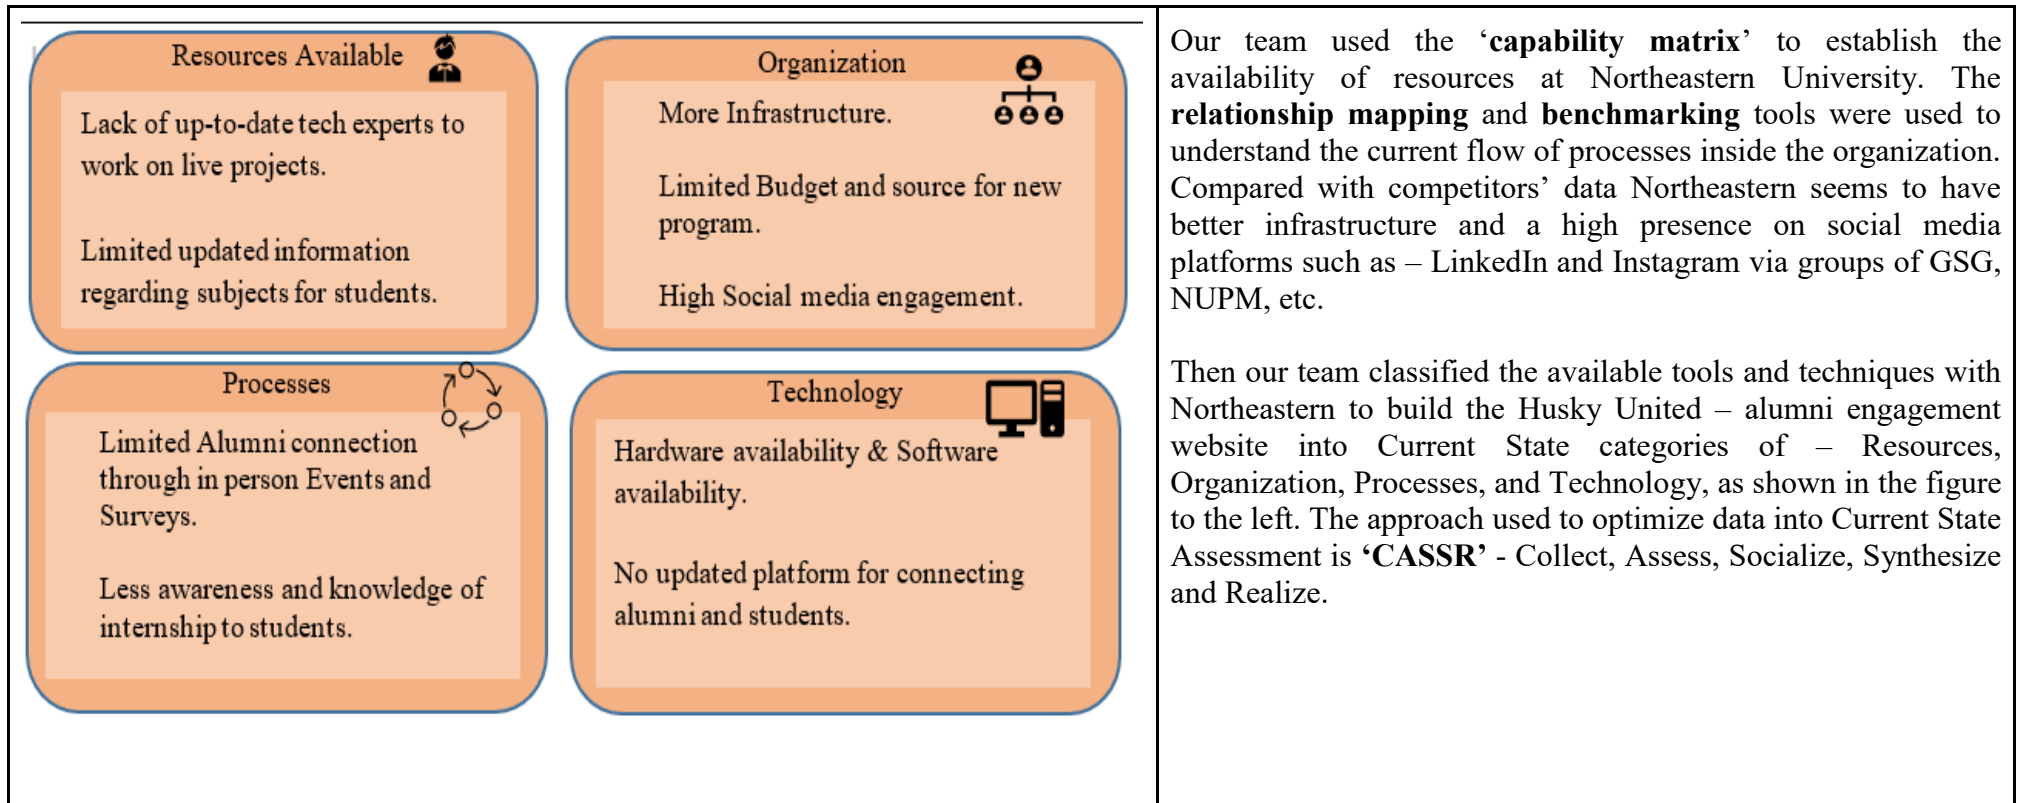

Alumni Engagement Opportunity Needs Assessment

Time consuming process of finding the right people of the specific industry	Current students can get confused and exhausted in order to find the required person	It gets time consuming and there will be less engagement on portal with the alumni	The enhanced feature of our portal has an option to shortlist from the required industry and schedule a direct meeting which would result in less consumption of time
Loophole in securing references from alumni	Affect the current students for not getting the required reference	New incoming students would consider this portal as of no use	The portal posts 5-10 short videos and posts about the skills and to have in depth knowledge and by gaining them and meeting the requirements the alumni can give references.
Improper Communication of the requirements by BA	Due to this, the web developer will not be aware of the actual requirements and the scope of the project	Overall impact on the stakeholders and users' expectations. The users as well as stakeholders will not get the desired outcome, resulting in dissatisfaction among the users and stakeholders	1. To eliminate this problem, we will channelize the MOSCOW methodology and RACI approach throughout the organization, which will help us to understand the requirements elicitation. 2. We will also create the 'minutes' of the meeting between the BA and the client to keep the track record of the requirements of the project.
Delay in the Testing phase	Affect the budget and timeline of the project	Impacts on the delay of the launch of the portal	Working on continuous process improvement through maintenance and provide the dedicated pre-analysis time to complete the testing gaps.

Alumni Engagement Opportunity Needs Assessment

Current State Assessment

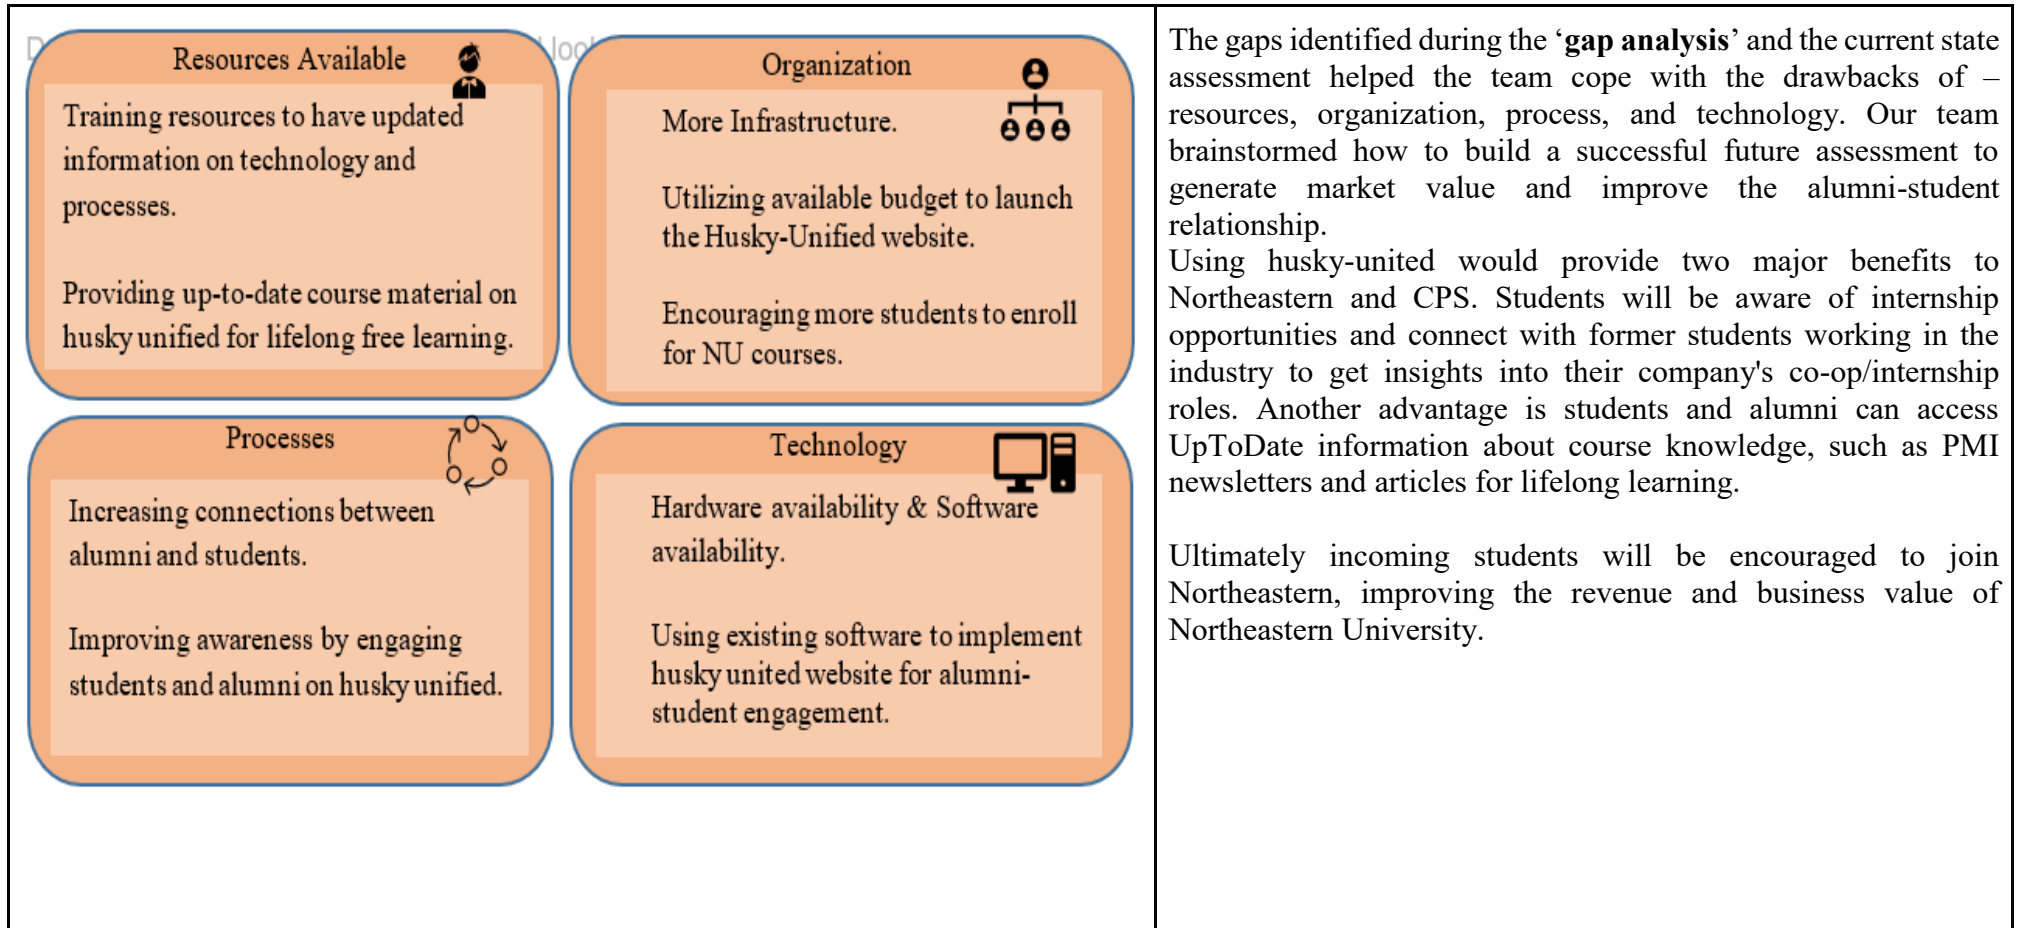

Analysis

Alumni Engagement Opportunity Needs Assessment

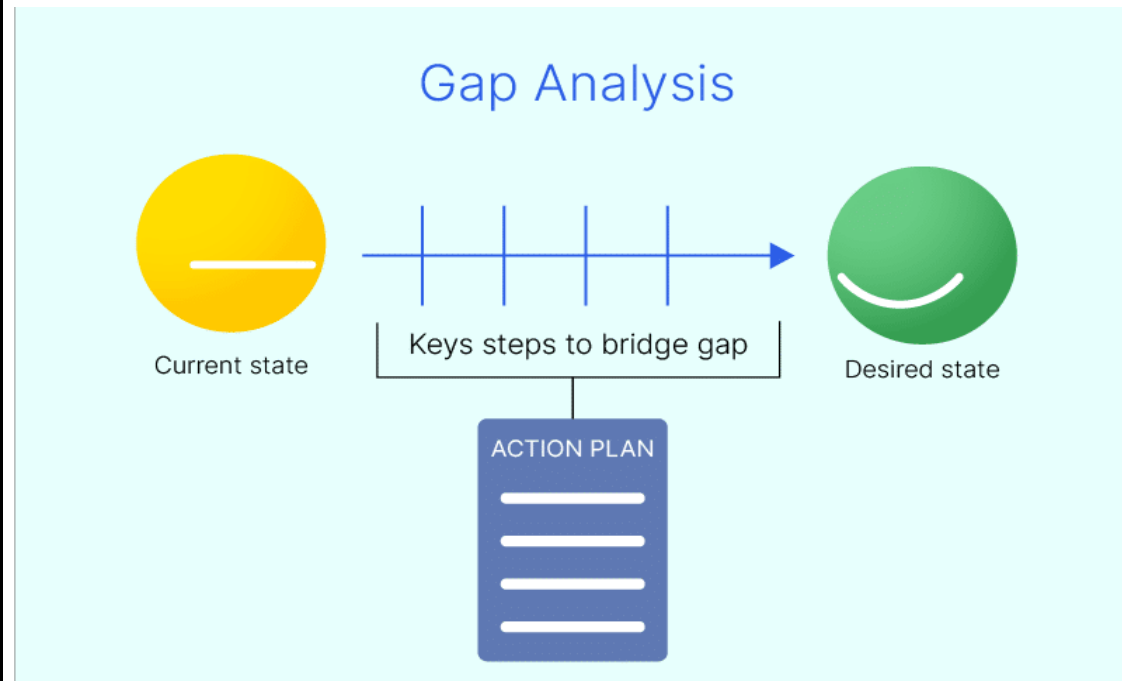

Future State Assessment

Analysis

Alumni Engagement Opportunity Needs Assessment

Gap Analysis

ACTION PLAN

Design a portal with enhanced features
Increase student engagement by 30%
Shortlist industry specific
One on one interviews with Alumni

The four steps used for Gap Analysis are,

Step 1: **Identify the current situation**

Our team used 'capability matrix' to establish the availability resources

Alumni Engagement Opportunity Needs Assessment

Step 2: **Setting S.M.A.R.T goals**

Specific: To design a portal for enhancing student engagement with alumni

Measurable: Using KPI's to measure the success criteria, like, CSAT (Customer Satisfaction), Response time (TTI).

Achievable: Achieve the maximum reachability by 30% in student-alumni engagement

Relevant: Expanding the network of students and securing jobs

Time-bound: To launch the portal by the end of year

Step 3: **Analyze gaps:**

Identified gaps:

- 1) Lack of commitment from the alumni
- 2) Time consuming process of finding the right people of the specific industry
- 3) Loophole in securing references from alumni

Step 4: **Establish a plan to close gaps**

- Design a portal to fix loopholes and give enhancements to the current.
- Regular updating database
- Providing additive benefits for active participation
- Having point systems to gain Recommendations
- Conduct analysis and perform documentation.

Application of Gap Analysis

- External Benchmarking
- Improving or Enhancing Processes
- Profit Percentage Analysis

Alumni Engagement Opportunity Needs Assessment

Assumptions

Stakeholders (values, expectations)

External Stakeholder:

- Alumni-Student Engagement (Northeastern University).
- Project sponsor
- Board Members

Internal Stakeholders:

- Employees
- Managers
- Advertising Team
- Marketing Team
- Business Analyst

Expectations:

- Create a portal where Alumni and current students can interact with each other without any hassle.
- provide features where students can search for alumni based on their industry.
- An ecosystem where they can connect via video conferencing.
- A channel to create their profile which includes their overall background, resume and if they want video resume too.
- Contact, connect and make all the students & alumni aware of this portal.
- Providing resources for generating better networking among students and alumni.
- A feature where students get notification to take a follow-up regarding the previous conversation or revert to the alumni message.

Values:

Alumni Engagement Opportunity Needs Assessment

- Help in increasing the reachability between the student and alumni by 30%.
- Help in creating a business case.
- Help in providing the team with product information, services, and solutions.
- Providing expertise throughout the project's lifecycle.
- Helping in reducing and uncovering the risk.
- Increasing project success rate.
- Providing and granting project acceptance criteria.

Assumptions

- Alumni will participate actively
- All the tests are positive on the first try
- All the stakeholders will attend the meeting
- Required database will be easy to find

Constraints

- Project must be completed within the listed scope.
- Must be completed within the period of 222 days (about 7 and a half months), that is from January 7, 2019, to November 12, 2019.
- Budget should not be exceeded.
- Access to people with provide husky portal Id's.
- Provide two factor authentication.

Solution Alternatives

Alternatives

Feasibility

Peer-to-peer texting software: Developing software for easy texting to alumni

Easy to text within their own time and isn't obliged to be present at a specific time

Alumni Engagement Opportunity Needs Assessment

Reunion events: Reunion events to know the importance of schools	It's feasible to conduct reunion events
Conducting activities: Conducting activities for alumni and current students and giving benefits like using the student resources.	It's feasible for students to interact in activities as it is not boring

Business unit:	Alumni Engagement - CPS (College of Professional Studies)			

A. PURPOSE

A brief introductory statement defining the purpose of the benefits management plan, including (for example)

The benefits management plan assesses the summary of our project of Alumni-student engagement relations. It generates value in the organization and has an enormous impact on the program/project. It recognizes the statement and identifies the process and progress summary of the project plan. The BM (Benefits Management) plan also explains the rigorous process of drafting, analyzing, measuring the resources and tools used in the project. project/ program. This plan will give brief details of benefits metrics, project necessities, communication techniques, and delivering the results.

B. DEFINITION OF EACH PROGRAM/PROJECT BENEFIT

Benefit Number	Benefit	Type of Benefit - tangible and intangible, financial and non-financial, extrinsic or intrinsic	Describe how benefit will be realized
1.	guidance to students regarding effective resume and skills required	Intangible	The portal will allow the students to send their resume for review to alumni with an auto written message which could also be editable. Along with that the skills which needed to be acquired can be attained by the portal's in-built feature
2.	Knowledge of better career options	Intangible	The website has a feature in which the student can post their queries which will be noticeable to all the alumni. This feature will allow the student to get his query answered by a vast number of alumni. The portal has an AI help assistance to make it convenient for studnets
3.	Increased Co-op/ Internships opportunities	Financial	The website will allow students to connect with the alumni of the similar field they are targeting and make relations with them. There will be an option for them to ask for referral for the company in which the alumni are currently working. This will help in engaging more students and Northeastern's brand name will be more widespread

4.	Mentorship	Intangible	There will be a feature in the website in which the student and alumni can connect through video call. This will help those students who are feeling low and need guidance from the people who faced difficulties and help them with the job searching problems.
5.	Opportunity of working on Industry leading projects	Non-financial & Intrinsic	In the website we have provided a feature for t alumni to post the projects they are working on. Students can apply to work & help the alumni on the project. This will allow them to gain some work experience. And learn to work in an actual workplace

C. ASSUMPTIONS

This section lists any assumptions associated with the benefits defined in the plan such as availability of resources at the required time.

Assumption Number	Assumption	Probability of Being True	Impact if not true

D. EACH BENEFIT'S IMPACT TO THE PROGRAM'S OUTCOMES/ ALIGNMENT TO BUSINESS STRATEGY

BENEFIT NUMBER	BENEFIT	PROGRAM/PROJECT GOAL/OUTCOME AND BUSINESS STRATEGY ALIGNMENT	BENEFIT OWNER
1	Improved market value for northeastern CPS across the globe.	NU lifelong learning network with project management insights for alumni.	Project manager (Rashi vora)
2	in-house tools and software for northeastern university with free lifelong learning avoiding additional cost of third-party software and tools for students in NU.	up to date templates and tools for practice to alumni and students	Business analyst (hitarth joshi)
3	Releasing the program before 2025 generates exponential roi in the next 5 years.	alumni-student engagement platform for mentorship, co-op, and job under northeastern 2025 strategy.	Business analyst (rashmi kulkarni)
4	Attracts maximum incoming students in next 2-3 years improving student enrollment and northeastern education business value.	Husky united alumni-student engagement program launch by 2019	Program manager (roos johan)

E. METRICS AND PROCEDURES TO MEASURE BENEFITS

Benefit Number	Benefit	Metric	Procedure to measure benefit
1	Relationship, Networking & Connectivity Benefit Improvising Student-Alumni engagement connections through C-SAT (Customer satisfaction benefit)	Small term goal: Improve student-engagement performance through regular feedbacks at least by 10% Mid-term goal: Implementing AI (Artificial Intelligence) help desks Long term goal: Improve efficiency and transparency in between 45-55%)	<p>To measure this benefit, focus should be on continuous process improvements, work on regular activities, persistently measure All progress through KPI (KEY PERFORMANCE INDICES) in the SLOC Metrics software and document them in benefits plan register.</p> <p>Providing them scaling metrics on the website for gaining feedback.</p>
2	Portal Exposure Benefit (Utilization of all the provided resources)	Small term goal: Proactively reaching out to the customers via increasing reachability by 10 people per week Mid-term goal: Increasing workshops and interviews by 20 people per week Long term goal: Rise in referrals more than 50% than regular intervals	<p>Identifying the various website statistics, continuously managing the URL of portal by regular maintenance through analyzation of all the tools and resources of portal from Resource standard metrics software).</p> <p>Giving helpdesks pages to students and alumni's for getting updates about all the tools and platform of website</p>
3	Work Culture Database Benefit (Learnings for the USA based corporate as well other sector work culture knowledge)	Increase market exposure by 25% through providing articles, US (United States) company TED talks based on working experience in corporate and other sector.	This benefit will be measured by thorough evaluation of all alumni and student database connections and then followed by their networking relations with the firms, here we will use Source monitor tool for calculating the database benefit

F. ROLES AND RESPONSIBILITIES FOR BENEFITS REALIZATION AND MANAGEMENT

Activity	Resource 1	Resource 2	Resource 3	Resource 4
Seamless portal accessibility	Project Manager	Business Analyst	Project Sponsor	Benefits Manager

G. BENEFITS MANAGEMENT COMMUNICATIONS MANAGEMENT PLAN

This section describes the communications methods to be used to ensure each stakeholder has the information he or she requires regarding benefits management. It also describes how benefits will be reviewed with stakeholders and the content of the benefits realization report.

What needs to be communicated?	Who receives the information?	How is the information distributed?	Who distributes the info?	When is it distributed?	What is the purpose of the communication?

H. BENEFITS DELIVERY SCHEDULE

This section presents a schedule, typically in a Gantt, Roadmap, or Table format, to show the planned and actual dates for each of the identified benefits. The schedule should show the interdependencies between benefits from the various projects in the program and other work that is part of the program. The timeframe to realize benefits may be immediate, short, long or on-going. In many cases, the benefit is not known until transition is completed.

Benefit Number	Benefit	Plan Date for Realization	Actual Date for Realization

I. BENEFITS-RELATED RISKS

Risk Number	Risk	Benefit aligned to	Probability	Impact
1	Ethnicities are not considered in platform data.	Public awareness of NEU's international students' visibility and opportunities	Medium	The platform's accessibility to international students is weak, resulting in lower network usage.
2	Adversary competition	Enhance the competitiveness of Husky-United Portal	Low	Diminishing willingness for students to utilize the Husky-United Portal
3	Students excessively rely on the info of employment career advice from alumni	Students-Alumni engagement could be interactive and mutual in a beneficial way	Medium	Students losing interest in exploring other sectors of advice besides career
4	Transition of changing students' habits of harnessing other NEU's online platforms	Forming a reliable and stable dependency between Husky-United Portal and students/alumni	High	A declining rate of aspiration for students to utilize other NEU online platforms, causing situations of innovation needed

J. REQUIRED CHANGES TO PROCESSES AND SYSTEMS

This section discusses new processes and systems and those already in existence that must be changed to handle benefits realization and management.

Description of Process/System to be added or changed	Responsibility	When it is needed and impact if not in place

K. TRANSITION OF THE PROGRAM'S BENEFITS INTO ONGOING OPERATIONS AND BENEFITS SUSTAINMENT

This section describes how the program/project will transition into ongoing operations with an emphasis on how the program's benefits will be sustained. If there is a specific plan for this, provide a link.

Activities	Responsible	Overview of Work

L. APPROVALS

This section contains the approval of the benefits realization plan by the program sponsor, program manager, program management office, members of the Governance Board, and other key stakeholders.

Business unit:	Alumni Engagement - CPS

A. PURPOSE

THE PROJECT LIFECYCLE OF OUR HUSKY UNITED PORTAL STARTS OFF WITH IMPLEMENTATION, MOVING FORWARD WITH PLANNING, EXECUTION AND MONITORING AND CONTROL. AFTER THE EXECUTION PHASE WHEN THE PORTAL IS HANDED OVER TO THE MONITOR AND CONTROL PHASE, THE TRANSITION PLAN COMES INTO PLAY WHERE WE START OFF BY DRAFTING AN EFFECTIVE TRANSITION PLAN, ASSIGNING RESPONSIBILITIES AND GETTING APPROVAL FROM THE STAKEHOLDERS AND FINALLY MOVING TO EXECUTION OF THE TRANSITION PLAN SEAMLESSLY WITH THE ADEQUATE REQUIREMENTS AND APPROVAL OF ALL THE REQUIREMENTS. THE OVERALL RESPONSIBILITY IS OF THE BUSINESS ANALYST WITH THE CONSULTATION OF THE PROJECT MANAGER

B. TRANSITION PROCESS

Process	Responsible	Consulted	Approved	Informed	Description of work
Transition Plan	Business Analyst (Hitarth Joshi)	Project Manager (Rashi Vora) & Development Team	Project Manager (Rashi Vora) & the sponsor	Stakeholders	<p>Step 1 Creating transition plan --> includes duties and responsibilities --> Responsibility of a Business Analyst</p> <p>Step 2 Consulting with PM and Developing Team --> implementing changes in the transition plan</p> <p>Step 3 Documentation and presentation of the updated transition plan --> Get approval</p> <p>Step 4 Inform the key stakeholders --> Receive feedback</p>
Benefits Measurement	Project Manager (Rashi Vora)	Business Analyst (Hitarth Joshi) & Development Team	Sponsors (Alumni-student engagement relations)	Stakeholders	<p>In the benefits measurements we would be following the benefits realization management framework. Which includes identification, executing and sustainability.</p> <p>Step 1 The project manager is responsible for identifying the objectives, outcomes, and the tangible and intangible benefits.</p> <p>Step 2 Document the benefits by consulting the Business analyst and the Development team</p> <p>Step 3 The next step would be capturing the benefits measurements by the PM.</p> <p>Step Approval by the project sponsors</p>
Approval Requirements	Project Manager (Rashi Vora)	Business Analyst (Hitarth Joshi)	Business Analyst	Stakeholders	After every sprint, the project manager will be

	Vora)	Joshi) & Development Team	(Hitarth Joshi), Development Team & Sponsors		responsible for seeking the approval of the work done or any other work that needs to be done from the associated party. Before this the Project manager must consult all the measures of the work done by the BA & Development team. After consulting with them he must go and seek the approval from the sponsor. After getting the approval the PM must dictate this to stakeholders.
Continue with other process/ deliverables	Business Analyst (Hitarth Joshi)	Project Manager (Rashi Vora)	Project Manager (Rashi Vora) & Development Team	stakeholders	The Business Analyst will be responsible for improving and continuing the deliverable during the lifecycle of the project. BA needs to consult this process with the PM before implementing them. After consulting it with the PM, it needed to be approved by the PM & development team. When the deliverables are being approved. Stakeholders need to be informed about the deliverables.

C. COMPONENT TRANSITION REQUESTS

This section describes the process to be followed to prepare a transition request each time a component is officially closed to transition the benefits from the component into ongoing operational status, to the customer, or to another program.

Component	Transition Request to be prepared by:	Operational Area Receiving component/ benefit	Process to be followed:

D. DOCUMENTATION REQUIREMENTS

This section describes the documentation to be prepared as part of the transition process. It also includes a description

of any training to be provided or materials that may be needed.

Documentation/ Training/ Materials	Description	Responsible	Key role of this deliverable/ impact if not available
Project Charter	Divided into 5 phases of the project for	Project Manager	Outlines all the project phases with detailed explanations and timeline, High Impact
Scope Management Plan	Plans out the complete scope of the project by listing out the changes and assessments	PM & Stakeholders	It identifies the purpose and upcoming factors are dependent on it, High Impact.
Responsibility and workforce check sheet	Assigns roles to the workforce for key resource allocations	PM AND BA	Follows the RACI Chart, Moderate Impact
Project Progress Sheet	Identifies the current progress of the project and maintains it for the further process	Business Analyst	Constantly Tracks the progress and realization for future improvisations. Moderate Impact
Change management plan and benefit management plan	Measures all the needs assessments by creating the plan and documenting all the important procedures in the process.	BA & PM	Focuses on completing and analyzing all the needs. Moderate Impact.

E. ROLES AND RESPONSIBILITIES FOR BENEFITS TRANSITION

This section describes the roles and responsibilities of the program/project management team as well as the receiving organization in the transition process.

Stakeholder	Project Team or Receiving Organization	Role	Responsibility
Mr. Vora	Y United - Alumni-Student Management.	Project Manager.	Develop benefits transition plan for measuring solution benefits and assessing them.
Mr. Joshi	Y United - Alumni-Student Management.	Business Analyst - Head	Assess actual benefits with planned benefits and document them.
Mr. Meru	Y United - Alumni-Student Management.	Business Analyst.1	Create visualization reports for analyzing the business benefits and transition plan.
Mr. Kulkarni	Y United - Alumni-Student Management.	Business Analyst 2	Execute the transition plan, reports and perform solution evaluation on data to implement solution assessment against KPIs.

ui ni	y United - Alumni-Student gement.	ness Analyst 3	ss the benefits realization and perform ation against evaluated solutions plan.
sor	neastern – CPS	sor	de a Go/No Go decision on the validated ion and benefits transition plan for project over.
Johan	neastern – CPS	Professor Head of ni-Student gement case.	ate the solution provided by Husky United and verify it against the SMART scope ctives and assumptions.
Lio Altali	Northeastern – CPS	Change Manager Northeastern-CPS Professor	Handle Change Management for Husky United at the customer site for requesting new changes to Alumni- Student Engagement team and approval of change.

F. TRANSITION ASSUMPTIONS

This section lists any assumptions associated with the benefits defined in the plan such as availability of resources at the required time or link to Assumptions Log

Assumption Number	Assumption	Probability of Being True	Impact if not true
1	Alumni Participating proactively	Medium	High
2	Successful testing rate in first trial	Medium	High
3	Stakeholders Involvement in attending meeting	High	High
4	Alumni and student Database will be available easily	Low	High
5	Getting Desired Referrals from Alumni to students	Medium	High

G. TRANSITION –RELATED RISKS – CONSIDER LINKING TO THE PROJECT RISK REGISTER (AABHAS)

This section describes the risks associated with benefits transition or link to Risk Register

Risk Number	Risk	Benefit aligned to	Probability	Impact
1.	Delay in project delivery	Increased Budget	Low	Moderate
2.	Unavailability of senior developer	Affecting timeline & error in developing	Moderate	High
3.	Scope Creep (Multiple stakeholder opinion)	Affecting Triple Constraint	High	High
4.	Errors while back testing	Delay in delivery	Moderate	Moderate
5.	Interest conflict among team members	Affecting quality of	Low	Low

		work		
--	--	------	--	--

H. TRANSITION CRITICAL SUCCESS FACTORS (SPIROS)

This section describes the critical success factors that are considered essential to ongoing benefits transition and sustainment. This answers the question “What must go well/ right for the benefits transition and sustainment to be successful?”

Critical Success Factor	Responsible	Strategy to implement	Impact if not implemented
Optimized Data	BA: Data filtered/collection	Compare the previous database to our users, such as alumni and currently enrolled students	The portal would be determined as efficient or not to draw our customer’s attention
Stakeholders’ expectations and follow-up	PM/BA: Deliverables fulfillments	Constant communication and coordination within the PM team and stakeholders could be beneficial to progress where BA/Program team could easily produce the portal flawlessly	inadequate working knowledge/expertise for both PM and programmers would not be able to align with our stakeholders and fall out of track
Portal exposures	Marketing manager: commercial promotion	Social and working platforms such as Facebook, Instagram, and LinkedIn could be essential approach for exposing our portal to certain amount of public consciousness	KPI for reaching out to ideal number of alumni and students would fail and lead to insufficient exposures

I. ROLES AND RESPONSIBILITIES FOR BENEFITS SUSTAINMENT

Activity	Resource 1	Resource 2	Resource 3	Resource 4	Resource 5
Transition phase from design of prototype 1 to development of the approved prototype	Project Manager	Business Analyst	Development team	Design manager	Project sponsor
Transition from development to the testing phase	Project Manager	Business Analyst	Project sponsor	Development team	Quality assurance team

ACTIVITY	PROJECT MANAGER	BUSINESS ANALYST	PROJECT SPONSOR	DEVELOPMENT TEAM		
Create effective transition Plan	C	R	A	I		
Assign roles and responsibilities	R	C	A	I

J. SUSTAINMENT CRITICAL SUCCESS FACTORS

Critical Success Factor	Responsible	Strategy to implement	Impact if not implemented
Techniques for productive tracking and analysis	BA/PM/Quality Manager	To study the reach, engagement, target audience, online traffic, and other metrics, develop and use appropriate data analytics, interpretation, and analysis tools.	The incorrect analysis will result in an unreliable report, which sustainability for long-term goal could easily fail
Data processing	BA/Data analyst	Set up a comprehensive data gathering and storage system by outsourcing professional data analysts	Data shortages and inaccuracy could lead to vital information missing

K. BENEFITS SUSTAINMENT COMMUNICATIONS PLAN

This section describes the communications methods to be used to ensure each stakeholder has the information he or she requires regarding benefits sustainment. It also describes how benefits will be reviewed with stakeholders and describes the content of the resulting report(s).

What needs to be communicated?	Who receives the information?	How is the information distributed?	Who distributes the info?	When is it distributed?	What is the purpose of the communication?

L. BENEFITS –SUSTAINMENT RELATED RISKS – CONSIDER LINKING TO THE PROJECT RISK REGISTER

Risk Number	Risk	Benefit aligned to	Probability	Impact
1.	Technical Error (4XX Error code & 5XX error code)	Students will not be able to interact with alumni	Moderate	Moderate
2.	Lags while video conferencing	Affecting the communication and proper delivery of the message	High	Moderate
3.	Crash down of website due to large number of users at the same time	Delay in receiving the answers to query, co-op referrals and project acceptance response.	Moderate	High

M. REQUIRED CHANGES TO PROCESSES AND SYSTEMS FOR BENEFITS SUSTAINMENT

This section discusses new processes and systems and those already in existence that must be maintained to handle benefits sustainment and management.

Description of Process/System to be added or changed	Responsibility	When it is needed and impact if not in place

SOLUTION EVALUATION PLAN SUMMARY

Solution Evaluation is one of the knowledge areas of Business Analysis. It helps assess the performance of the solution produced from the project and recommend any actions based on the feedback of the evaluation.

There are predefined tasks for solution evaluation:

1. **Measure Solution Performance:** Measuring needs defining, validating, and collecting metrics for measurement of solution performance.
2. **Analyze Performance:** Analyzing performance requires comparing the earned benefits of the solutions with actual benefits. It requires assessing the risks, trends, accuracy, and variances in the measurement.
3. **Assess Performance:** The Assessment takes input from the analyzed performance data and provides output such as Stakeholder impact analysis, risk register with mitigation, and Test results with user feedback and lessons learned.
4. **Recommend Actions:** The lessons learned, and impact assessment become input for this step, and the actions are the output for further changes in the project or performance improvement. If everything is under control, the action is provided as input for operations or the execution/delivery team.

The figure shows our Husky United Alumni-Student Engagement Solution Evaluation plan. Our team decided to evaluate the solution for the prototype and repeat the steps for every increment during the website page design for Alumni learning and Student engagement. Firstly, we would be measuring the performance by deciding on metrics (Net Promoter Score, User Satisfaction Score, MRR). Next, the prototype design is analyzed and assessed using data visualizations showing the actual and planned benefits in terms of cost, no. of Alumni and students using it, popularity, defects, limitations, etc. Our team of BA would suggest different ways to tackle the issues users are facing, such as rich UI and easy menu access to engaging more students.

Solution Evaluation	Duration	Start Date	End Date	Resources	Cost	Benefit
3.2 Solution Evaluation	14 days	Thu 5/30/19	Tue 6/18/19		\$69,160.00	\$69,160.00
3.2.1 Measure solution performance	3 days	Thu 5/30/19	Mon 6/3/19	Hardware machines[1],Infrastructure[1],Pri	\$59,400.00	\$59,400.00
3.2.2 Analyze performance metrics	3 days	Tue 6/4/19	Thu 6/6/19	Business Analyst	\$1,920.00	\$1,920.00
3.2.3 Assess limitations	3 days	Fri 6/7/19	Tue 6/11/19	Business Analyst	\$1,920.00	\$1,920.00
3.2.4 Identify enterprise limitations to implement solution	3 days	Wed 6/12/19	Fri 6/14/19	Business Analyst,Project Manager,Project Sp	\$4,320.00	\$4,320.00
3.2.5 Determine actions to improve solution value	2 days	Mon 6/17/19	Tue 6/18/19	Project Manager	\$1,600.00	\$1,600.00

1. Identify the organizational change(s) driven by the implementation of your solution.

Brief Description of the Change	
Notes: Developing a new portal named Husky United to expand the student alumni reachability from the current state with an increase of 30%. using the ADKAR change model	
<ul style="list-style-type: none">• Awareness:• Monitoring the usage of the portal• Implementing changes as per the feedback of the end users	Score 3
<ul style="list-style-type: none">• Desire• Career guidance by professionals working in the desired field to hone their resumes.• Providing co-op/internship referrals to the students who match the job description.• Opportunity of gaining in-hand experience of the projects on which the alumni are currently working on.	Score 5
<ul style="list-style-type: none">• Knowledge• Providing a feature on the student hub which would directly link to the husky united portal.• Emailing students about the launch of the portal with all the benefits• Conducting speaker series conferences with an advantage of Free food to the students attending the seminars.• Posting it on Northeastern University's official website and on social media platforms like Instagram, twitter, LinkedIn, and Facebook.• Printing pamphlets and banners and posting around the university for awareness.	Score 5
<ul style="list-style-type: none">• Ability• Providing step-by-step guidance to navigate the portal and explain all the features to new users as soon as they log in	Score 5

<ul style="list-style-type: none"> • Feature of in-built AI help assistance for issues and queries. • conduct in person and virtual workshops where students can understand the usage and acquire help in navigation as per their convenience 	
<ul style="list-style-type: none"> • Reinforcement • Providing Goodies and free food for in-person conferences • Providing recognitions on the LinkedIn profile if gained references which would lead to awareness of student's profile • No access to few features if the portal is not accesses for a certain amount of time and if the feedbacks are not completed. 	Score 5

2. Outline strategies and detailed tactics to overcome resistance to its implementation/changes.

Strategies	Tactics To overcome Resistance to Implementation/Changes	Impacts On different Stakeholders: <ul style="list-style-type: none"> • Northeastern University, • NU Student-Alumni Relations • CPS
Guidance & Communication	Rationalizing the team to reach its full potential through thorough communication – Before the change is implemented, communication and education about it should begin. This will assist your employees in rationalizing the change and ensuring that individuals and teams have enough knowledge to make sound decisions.	Medium impact , all 3 stakeholders will only accept change if the channel among the students and alumni is ensured and work on the desired outputs of the project.
Participation and Co-opting in the project	Setting goals that are hard, attainable, and interesting - Making objectives and targets, Break down change	Least impacted to the stakeholders, but some portions of project can be delayed due to different

	efforts into smaller milestones and reward success. Lastly, our Progressive goals will be aligned with desired values and beliefs.	perceptions of all 3 stakeholders
Allocating the roles & Responsibilities to the team members for performance evaluation	Implementing RACI approach & strategizing the project charter - By Establishing how the team member is most suited to assisting with the change project in one-on-one sessions and examine how it may help the individual address personal deficiencies while also leveraging their strengths, Charting the RACI approach will benefit to understand the assigned work and responsibilities	Not a major impact to stakeholders, but it may be time consuming in the initiation of project, but allocation brings advantage in schedule management
Accepting the innovative changes to drive continuous process improvements	Adapting specific tools and techniques to impose changes – Negotiating the change requirements amongst the team members, effectively applying the change policies by accepting the structured methodologies	Medium impact to all 3 stakeholders, but such change agreements can turn out to be costly for them as the engagement change is not guaranteed
Recognizing unhealthy patterns in the project	Managing the Technicalities – Here the step includes to implement technical fixes and addressing all the underlying patterns or performance impacting habits.	Medium Impact Stakeholders lose interest in some process improvements if they identify performance disturbing patterns
